25X1A

MEMORANDUM FOR : Security Staff, OSA

SUBJECT : TKH Material for [ ]

25X1A

25X1A

1. The attached memo from [ ] in NRO requested that we forward this TKH material to [ ]

25X1A

2. [ ] indicated in this case that so much time had gone by that they no longer needed this data.

3. Request you take action, as required, to have it destroyed.

4. This brings up a continuing problem in the exchange of data between the customers and the operational or contract personnel.

25X1A

25X1A

5. Intelligence has a considerable stock of [ ] TKH material for distribution. Copies should go to [ ] externally as well as to DD/OSA and DL/S&I.

25X1A

25X1A

6. I recommend that action be taken to set up a limited TKH center at [ ] if at all possible.

7. It is certainly in the best interests of the project to have product evaluation data available to TKH cleared personnel at these contractor facilities.

8. The other approach is to downgrade the data to T.S. CDRONA. NPIC has started doing this with most of their evaluation reports. However, [ ] is still producing their data as TKH and often including photographs. In spite of efforts to have [ ] produce their evaluation under the operational system, they are actually getting more deeply involved in TKH data.

25X1A

9. I recommend that an action officer be assigned from Security to review this overall problem.
